PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer currently employed at Wonder Crafts with 2+ years of hands-on experience building production-grade AI systems, scalable web applications, and RESTful APIs for local and international clients. Proficient in Python (Django, Flask, FastAPI) and AI/ML frameworks (PyTorch, TensorFlow, LangChain, LangGraph, LlamaIndex, DSPy), with deep expertise in RAG systems, LLM fine-tuning, prompt engineering, and local LLM deployment (Ollama). Experienced in computer vision (OpenCV, YOLO v5/v8, EasyOCR, Mediapipe) and NLP (spaCy, NLTK, Sentence Transformers). Strong command of vector databases (Pinecone, FAISS, Chroma, Qdrant), SQL/NoSQL databases, and cloud infrastructure (AWS, GCP) with CI/CD via GitHub Actions and Docker. Known for delivering end-to-end ML pipelines independently and driving measurable business impact through production reliability and inference optimization (ONNX, Quantization).

SKILL SUMMARY

Technical Skills

Languages: Python, SQL, JavaScript

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly

Frameworks: Django, Flask, FastAPI, Django REST Framework, React.js, Tailwind CSS

Machine Learning & AI: PyTorch, TensorFlow, Scikit-learn, LangChain, LlamaIndex, Hugging Face Transformers

Computer Vision & OCR: EasyOCR, Tesseract, OpenCV, YOLO (v5/v8)

NLP: spaCy, NLTK, Sentence Transformers

Platforms & Databases: AWS (CI/CD, EC2, S3), GCP, Docker, PostgreSQL, MySQL, SQLite, MongoDB, Redis

Tools: Git/GitHub, PyCharm, VS Code, Postman, Swagger/OpenAPI, pytest, Jupyter Notebook

Vector Databases: Pinecone, FAISS, Chroma, Qdrant, Weaviate, Supabase

Deployment & Integration: Model deployment, Vector database integration, Inference optimization (ONNX, Quantization), Backend & ML integration using FastAPI, Containerization with Docker

PROFESSIONAL EXPERIENCE

Full Stack AI/ML Developer

Wonder Crafts | Lahore, Pakistan | May 2026 – Present

- Building scalable web applications and production-ready RESTful APIs using Django, FastAPI, and React.js across the full development lifecycle.
- Collaborating with cross-functional teams to deliver high-quality, production-ready features on tight timelines.

Full Stack Developer

Virevo S.r.l. | Italy (Remote) | December 2025 – April 2026

- Developed international client projects using Django, FastAPI, React.js, and Next.js with AWS deployments and Docker containerization. Delivered high-performance, scalable full-stack solutions collaborating with Italian and international stakeholders across time zones.

Full Stack Developer (MERN Stack)

Axaura Tech | Pakistan | August 2025 – December 2025

- Built full-stack web applications using React.js, Node.js, Express.js, and MongoDB, covering frontend, backend APIs, and database design end-to-end.
- Followed clean code practices, Git-based version control, and collaborative workflows throughout the internship program.

Full Stack Developer

Digital Empowerment Network — DEN | Pakistan | December 2024 – March 2025

- Built and deployed end-to-end web solutions applying industry-standard backend engineering and database design practices. Gained strong foundations in backend engineering, database design, and automated workflows.

KEY ACHIEVEMENTS

- ◆ Delivered community cleanup platform on schedule, driving 25% task completion uplift across 1,000+ citizens — equivalent to ~200 additional completed cleanup tasks per month.
- ◆ Reduced fire hazard incident response time by ~3 hours per cycle through real-time notification system, serving 2,500+ residents with 30% higher engagement.
- ◆ Optimized API infrastructure to process 500+ daily transactions with 99.9% uptime, saving ~\$2,400/year in estimated server retry costs.
- ◆ Awarded Certificate of Appreciation at Virevo S.r.l. (Italy) for exceptional Full-Stack Development — one of the first international recognitions in career, within 5 months of joining.
- ◆ Awarded Certificate of Appreciation at Wonder Crafts by CTO Bilal Saeed for outstanding contribution as a Full-Stack Developer.
- ◆ Completed two internship programs simultaneously across MERN and Python/Django stacks, demonstrating rapid multi-stack proficiency.

PROJECT

- ◆ **Dubai Land Department (DLD)** [LINK](#)
Real Estate Analytics Platform (Professional) Contributed to a property market analytics system processing CMA data, transaction records, and ROI calculations for Dubai Marina and surrounding communities — integrating structured real estate data pipelines with Python backend services.
- ◆ **Promzia — AI Prompt Library with MCP Integration** [LINK](#)
Full-stack TypeScript monorepo platform serving 3,000+ AI prompts with Claude Desktop and ChatGPT integration via MCP; built features across Django/FastAPI backend, React.js frontend, PostgreSQL search optimization, and prompt ratings system.
- ◆ **Gymshark(gymshark.com)** [LINK](#)
Bold visuals, strong lifestyle photography, and clean navigation on all devices.
- ◆ **RetailAnalytics Copilot** [LINK](#)
A powerful local AI agent combining RAG + SQL for intelligent retail analytics.
- ◆ **Refiner** [LINK](#)
Next.js + Gemini API tool with live token streaming, 5 text transformations, mid-stream cancel, and dual API key rotation.
- ◆ **Flask Web App with CI/CD and Docker Integration** [LINK](#)
A production-ready Flask app featuring complete CI/CD pipelines with GitHub Actions and Docker. Demonstrates automated testing, continuous deployment, and container orchestration.
- ◆ **Interactive Quiz Game** [LINK](#)
Developing a web-based quiz game with FastAPI and PostgreSQL featuring multiple-choice questions and data analytics.
- ◆ **AI-Powered Hand Gesture Drawing System** [LINK](#)
A real-time hand tracking and gesture detection project using Python, OpenCV, and Mediapipe. It enables users to draw on a virtual canvas using hand gestures and save their artwork
- ◆ **Simple Real Time Object Detection** [LINK](#)
Built a real-time object detection system using OpenCV and TensorFlow, demonstrating proficiency in computer vision and deep learning.
- ◆ **Personality Prediction System via CV Analysis** [LINK](#)
Designed an AI-powered system that analyzes facial images to predict personality traits, combining computer vision, deep learning, and natural language processing.
- ◆ **University Administration Management System** [LINK](#)
Django-based system streamlining room and mess management, payments, complaints, attendance, and notifications.

EDUCATION

Bachelor of Science in Computer Software Engineering
University of Engineering and Technology, Mardan | CGPA: 2.51/4.0 | 2021 – 2025

CERTIFICATE

Wonder Crafts Certificate of Appreciation: Awarded in recognition of outstanding contribution as a Full-Stack Developer at Wonder Crafts, issued by CTO Bilal Saeed. | CERTIFICATE

Virevo S.r.l. Certificate of Appreciation: Awarded for exceptional Full-Stack Development services at Virevo S.r.l., Dekali, Italy (December 2025 – April 2026), issued by CEO Amini Mogtaba.

Axaura Tech Certificate of Achievement: Completed MERN Stack Development internship (August – December 2025), issued by Director Azmat Ullah and CEO Wajid Ali Khan — Axaura Tech.

PythonWebDevPro: Advanced web dev course - Flask, Django, HTML, CSS & Bootstrap certification. [CERTIFICATE](#)

Inter Universities Programming Challenge (2024): Recognized for active participation organized by the Artificial Intelligence Community of Pakistan. [CERTIFICATE](#)

Python Development (EcodeCamp): Completed a virtual internship (Sep-Oct 2024) with excellent performance. [CERTIFICATE](#)

Python Development (EcodeCamp): Python internship specializing in data analysis and backend programming. [CERTIFICATE](#)

DEN Coding Cup Awarded for outstanding participation, showcasing curiosity and creativity. Certificate ID: DENP1942. [CERTIFICATE](#)
