

MUMTAZ ALI

Full Stack AI/ML Developer

Islamabad, Pakistan | +92 347 6338292 | engrmumtazali01@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio Site](#)

Professional Summary

Results-driven Full Stack AI/ML Developer with 2+ years of hands-on professional experience delivering high-performance web applications, production-grade RESTful APIs, and AI-powered systems for local and international clients. Highly proficient in Python (Django, Flask, FastAPI) and JavaScript (React.js, Next.js, Node.js), with a strong command of PostgreSQL, MongoDB, and MySQL. Experienced in building RAG pipelines, LLM integrations, and computer vision systems, alongside cloud infrastructure (AWS), Docker, and CI/CD automation. Known for taking full ownership of projects end-to-end, communicating effectively with cross-functional and international teams, and consistently delivering on tight deadlines with a focus on code quality and measurable business impact.

Skill Summary

Languages	Python, SQL, JavaScript (ES6+), TypeScript
Frameworks	Django, Django REST Framework, Flask, FastAPI, React.js, Next.js, Node.js, Express.js
AI / ML & Data Science	PyTorch, TensorFlow, Scikit-learn, LangChain, LlamaIndex, Hugging Face Transformers, Pandas, NumPy
Computer Vision & OCR	OpenCV, YOLO (v5/v8), EasyOCR, Tesseract, Mediapipe, Matplotlib, Seaborn, Plotly
NLP	spaCy, NLTK, Sentence Transformers
Vector Databases	Pinecone, FAISS, Chroma, Qdrant, Weaviate
Databases	PostgreSQL, MySQL, MongoDB, SQLite, Redis, Supabase
DevOps & Deployment	Docker, Docker Compose, GitHub Actions, AWS (EC2, S3, Lambda, CodePipeline), GCP, ONNX, Quantization
Scraping	Selenium, BeautifulSoup, Scrapy
Tools	Git/GitHub, VS Code, PyCharm, Postman, Swagger/OpenAPI, pytest, Jupyter Notebook
UI	Tailwind CSS, HTML5, CSS3, Bootstrap

Professional Experience

Full Stack AI/ML Developer

May 2026 – Present

Wonder Crafts — Lahore, Pakistan

- Building scalable web applications and production-ready RESTful APIs using Django, FastAPI, and React.js across the full development lifecycle.
- Collaborating with cross-functional teams to deliver high-quality, production-ready features on tight timelines.

Full Stack Developer

December 2025 – April 2026

Virevo S.r.l. — Italy (Remote)

- Developed international client projects using Django, FastAPI, React.js, and Next.js with AWS deployments and Docker containerization.
- Delivered high-performance, scalable full-stack solutions collaborating with Italian and international stakeholders across time zones.

Full Stack Developer Intern (MERN Stack)

August 2025 – December 2025

Axaura Tech — Pakistan

- Built full-stack web applications using React.js, Node.js, Express.js, and MongoDB, covering frontend, backend APIs, and database design end-to-end.
- Followed clean code practices, Git-based version control, and collaborative workflows throughout the internship program.

Full Stack Developer

December 2024 – March 2025

Digital Empowerment Network — DEN — Pakistan

- Built and deployed end-to-end web solutions applying industry-standard backend engineering and database design practices.
- Gained strong foundations in backend engineering, database design, and automated workflows.

Key Achievements

- Delivered a community cleanup platform on schedule, driving a 25% task completion uplift across 1,000+ citizens — equivalent to ~200 additional completed cleanup tasks per month.
- Reduced fire hazard incident response time by ~3 hours per cycle through a real-time notification system, serving 2,500+ residents with 30% higher engagement.
- Optimized API infrastructure to process 500+ daily transactions with 99.9% uptime, saving ~\$2,400/year in estimated server retry costs.
- Awarded a Certificate of Appreciation at Virevo S.r.l. (Italy) for exceptional Full-Stack Development — one of the first international recognitions in career, within 5 months of joining.
- Awarded a Certificate of Appreciation at Wonder Crafts by CTO Bilal Saeed for outstanding contribution as a Full-Stack Developer.
- Completed two internship programs simultaneously across MERN and Python/Django stacks, demonstrating rapid multi-stack proficiency.

Project Portfolio

A selection of production and personal projects spanning full-stack web development, AI/ML systems, and automation tools.

Featured AI / Full-Stack Builds

FinanceAI — AI-Powered Personal Finance Assistant

A multi-user financial companion built for a Full Stack AI Engineer assessment. Features natural-language Q&A over spending data, receipt OCR via vision models, intent-based routing between Claude Haiku and Sonnet for cost efficiency, anomaly detection via z-score analysis, budget tracking, and Supabase row-level security for multi-tenancy.

Tech: Next.js 14, TypeScript, Tailwind CSS, Supabase (Postgres), Clerk Auth, Anthropic Claude API, Recharts, Vercel

Fuel Route Optimizer API

A Django REST Framework API that plans cost-optimal fuel stops for any US road trip. Calculates a full route via a single OSRM call, samples candidate fuel stops every ~450 miles, and selects the cheapest state-level price within range — computing total trip cost, gallons needed, and an interactive map link entirely with free, key-less APIs.

Tech: Django, Django REST Framework, OSRM, Nominatim, SQLite, Docker

Dubai Land Department (DLD) — Real Estate Analytics Platform

Contributed to a professional property market analytics system processing CMA data, transaction records, and ROI calculations for Dubai Marina and surrounding communities, integrating structured real estate data pipelines with Python backend services.

Tech: Python, PostgreSQL, Data Pipelines

Promzia — AI Prompt Library with MCP Integration

A full-stack TypeScript monorepo platform serving 3,000+ AI prompts with Claude Desktop and ChatGPT integration via MCP. Built features across the Django/FastAPI backend, React.js frontend, PostgreSQL search optimization, and a prompt ratings system.

Tech: TypeScript, Django, FastAPI, React.js, PostgreSQL, MCP

Retail Analytics Copilot

A local AI agent combining Retrieval-Augmented Generation (RAG) with SQL querying for intelligent, conversational retail analytics.

Tech: Python, RAG, SQL, LLM Agents

AI-Powered Hand Gesture Drawing System

A real-time hand tracking and gesture detection application that lets users draw on a virtual canvas using hand gestures and save their artwork.

Tech: Python, OpenCV, Mediapipe

Personality Prediction System via CV Analysis

An AI-powered system analyzing facial images to predict personality traits, combining computer vision, deep learning, and natural language processing.

Tech: Python, OpenCV, Deep Learning, NLP

Simple Real-Time Object Detection

A real-time object detection system demonstrating proficiency in computer vision and deep learning pipelines.

Tech: Python, OpenCV, TensorFlow

Full-Stack Web Platforms

Axon Forge — Agency Platform [View Project](#)

A full-stack SaaS-style platform for a remote-first software development agency, showcasing service offerings, project portfolio, and client engagement workflows with a FastAPI backend and React + Vite frontend.

Tech: FastAPI, React, Vite, Vercel

Student Complaint Management System

A production-ready, multi-portal complaint management platform for universities supporting 10+ specialized portals (Student, Admin, Super Admin, Warden, Examination, Treasury, Security, Transport, Library, Sports, IT) with role-based access, real-time status tracking, file attachments, notifications, and an admin performance rating system.

Tech: Flutter, Django, Django REST Framework, PostgreSQL

ClickFit — Sports & Fitness Platform [View Project](#)

A full-stack fitness platform with a responsive Bootstrap 5 frontend, Node.js/Express backend, MySQL database with stored procedures for CRUD operations, drag-and-drop image upload, and RESTful API integration.

Tech: Node.js, Express.js, MySQL, Bootstrap 5, JQuery

University Administration Management System

A Django-based system streamlining hostel room and mess management, payments, complaints, attendance, and notifications.

Tech: Django, PostgreSQL

E-Commerce Website Development

A dynamic Django e-commerce platform with product browsing, cart, secure checkout, and order tracking.

Tech: Django, PostgreSQL, PayPal Integration

Online Learning Community Platform (StudyHub)

A dynamic Django-based web application facilitating online learning communities, allowing users to create, join, and participate in topic-based discussion rooms.

Tech: Django, PostgreSQL

Jewelry Shop Management System

A Django-based management system for streamlined inventory, orders, customer management, and sales tracking.

Tech: Django, PostgreSQL

Smart Expense Tracker

A FastAPI + SQLAlchemy web app with role-based access control (3 roles), JWT authentication, PDF invoice generation, AJAX-driven expense tracking, and Docker deployment.

Tech: FastAPI, SQLAlchemy, JWT, Docker

Interactive Quiz Game

A web-based quiz game with multiple-choice questions and data analytics on user performance.

Tech: FastAPI, PostgreSQL

Refiner — AI Text Transformation Tool

A Next.js + Gemini API tool featuring live token streaming, 5 distinct text transformations, mid-stream cancellation, and dual API key rotation for reliability.

Tech: Next.js, Gemini API

Flask Web App with CI/CD and Docker Integration

A production-ready Flask application featuring complete CI/CD pipelines with GitHub Actions and Docker, demonstrating automated testing, continuous deployment, and container orchestration.

Tech: Flask, Docker, GitHub Actions

Amazon Scraper

A Python project using Flask and BeautifulSoup to scrape and display Amazon product data.

Tech: Python, Flask, BeautifulSoup

Education

Bachelor of Science in Computer Software Engineering

University of Engineering and Technology, Mardan | CGPA: 3.42 / 4.0 | 2021 – 2025

Certifications

- Wonder Crafts Certificate of Appreciation — Awarded for outstanding contribution as a Full-Stack Developer, issued by CTO Bilal Saeed.
- Virevo S.r.l. Certificate of Appreciation — Awarded for exceptional Full-Stack Development services in Italy (Dec 2025 – Apr 2026), issued by CEO Amini Mogtaba.
- Axaura Tech Certificate of Achievement — Completed MERN Stack Development internship (Aug – Dec 2025), issued by Director Azmat Ullah and CEO Wajid Ali Khan.
- PythonWebDevPro — Advanced web development course covering Flask, Django, HTML, CSS & Bootstrap.
- Inter Universities Programming Challenge (2024) — Recognized for active participation, organized by the Artificial Intelligence Community of Pakistan.
- Python Development (EcodeCamp) — Completed a virtual internship (Sep–Oct 2024) with excellent performance, specializing in data analysis and backend programming.
- DEN Coding Cup — Awarded for outstanding participation, showcasing curiosity and creativity (Certificate ID: DENP1942).
